REPLY TO ATTN OF: AFCIN-4

SUBJECT: SMITIG Quarterly Report 29 April 1960

TO: Recipients of SMITIG Quarterly Report

1. In keeping abreast of the technological progress in the field of Aerospace, we have decided to integrate the functions of our Detachment in San Antonio with the missile and space activities here at ATIC. This move we believe will provide a more effective system orientation with a resultant improvement in our report contributions in the field of Technical Aerospace Analysis.

2. In the future, data contained in the SMITIG Quarterly Report will be appropriately reflected in our missile and space studies .. the first issue "Offensive Missile Systems Study" to be published on 15 July 1960. We are confident that in this manner we will continue to provide you with useful and helpful technical intelligence data.

3. The following studies will be published by ATIC:

a. Offensive Missile Systems Semi-Annual Study - July and January

b. Defensive Missile Sysems Semi-Annual Study - August and February

c. Space Systems Semi-Annual Study - October and April

4. The above studies will be supplemented by improved Weekly Missile and Space Systems Intelligence Reports, following the basic study format, and reporting significant input data and analytical results received or developed during the week.

USAF review(s) completed.
